“Complete System Solutions for Moving Corrosive Air”

Viron® International's Service Concept Includes:

Product Sales: Viron® never tries to 'oversell' a product that is not fit for purpose. The philosophy is to cultivate and maintain customer relationships on a long-term basis. This insures the continuity of the company.

Application Support: Products being designed within the organization Viron® can offer Application Advice and Support Service. This includes advice on product applications and problem solving available from our Viron® Engineering-Technical Support staff.

Customer Product Training: Even with carefully written Operation and Maintenance Manuals, there is an important need for Viron® International to offer after sales product/system Field Service-Operator Training. Such training is carried out on the installation site. Highly trained Viron® Technical Sales Personnel prides itself in offering this service to our customers.

Product Service & Repair: From time to time even the best-engineered and manufactured products require service or repair. Viron® authorized Manufacture Representative network supports you. Annual maintenance agreements are also available to ensure the installed systems are utilized to the maximum efficiency.

Personnel Training: To compete in the world marketplace Viron® believes it is important to recruit and train not only the best of their capabilities. This involves a structured training program, which ultimately ensures that you, the customer, are supported in the most professional way.

Customer Satisfaction: All of the above is a result of interaction with you, our customer. Viron® International's business is built on the foundation of listening to the marketplace. It is therefore vital that Viron® International continues to listen to your feedback. From time to time you may receive follow-up communication, which monitors your views. Please, therefore help us to improve our service by providing thorough and complete information.

"Complete System Solutions for Moving Corrosive Air"

Value for Money

In the present competitive environment none of the above would matter unless Viron[®] International is priced competitively. Constantly striving for optimized product design, lower costs, more efficient manufacturing and economical distribution, Viron[®] International's strategy is to remain the industry benchmark.

It is vital to the market that value for money is seen to be competitive. Viron[®] International has worked very hard to create a meaningful competitive price structure throughout our product lines.

Product Range

Our vast range of Odor and Pollution Control corrosion resistant ventilation control equipment provides customers with cutting edge products for the control of their WWTP and/or Water Treatment process to improve quality and help to reduce atmospheric Pollutants and Odors.

Worldwide Presence – a Global Organization

In order to satisfy the demands of the global market, it is Viron[®] International's strategy to be represented in all major markets worldwide.

To achieve this Viron[®] International has an exceptional Manufacturer Representative network which are dedicated to providing you, our customer, with a solution to your needs.

These offices, together with an additional international network, ensure that Viron[®] International is available locally to both you and your customers.

Manufacturing in two locations also provides us with a flexibility to tailor our output to meet demand in the Municipal Marketplace further optimizing our service to you.
